

1	CC – 1 Create hello world app and other simple web applications using AWS. (Use any AWS services like SAM, S3, Amplify)
1.b	WAD - Write a JavaScript Program to get the user registration data and push to array/local storage with AJAX POST method and data list in new page.
2	CC – 2. Use any cloud platform (PaaS environment) to launch the web applications.
1.a	WAD - Create a responsive web page which shows the ecommerce admin dashboard with sidebar and statistics in cards using HTML, CSS and Bootstrap.
3	CC – 3. Simulate a cloud scenario using CloudSim and run a scheduling algorithm that is not present in CloudSim.
3.a	WAD - Create a Node.JS Application which serves a static website.
4	CC – 4. Find a procedure to transfer the files from one virtual machine to another virtual machine.
2.c	WAD - Create an Angular application which will do following actions: Register User, Login User, Show User Data on Profile Component
5	CC – 5. Find a procedure to launch virtual machine using AWS.
2.b	WAD - Create Docker Container Environment (NVIDIA Docker or any other).
2	CC – 6. Design and deploy a web application in a PaaS environment. (AWS,Azure)
2.a	WAD - Create version control account on GitHub and using Git commands to create repository and push your code to GitHub.
2	CC – 4. Find a procedure to transfer the files from one virtual machine to another virtual machine.
4.a	WAD - Create a simple Mobile Website using jQuery Mobile.
